

**INSTALLATION INSTRUCTIONS FOR  
LIGHT FIXTURES WITH MEDIUM-BASE SOCKETS**

1. Remove (unscrew) metal cap nuts from face plate. Lift off face plate exposing wires. Pull house wires through 7/8" access hole in rear of back plate. Make electrical connections, white wire to white wire, black to black. Position on wall and secure with screws (provided) through mounting holes in rear of back plate.
2. Replace face plate and secure by replacing metal cap nuts. Medium-base bulbs required. No. G25-3" or No. G40-5" bulbs recommended except when glass shades are supplied with fixture. 60 watt clear standard bulb is then recommended.
