

CL100™ FlushTurn

The **CL100 Flush Turn** is specifically designed for sliding doors. It incorporates machined brass components that are either polished or satin chrome plated depending on the finish required.

Because of its shallow fitting depth and positive feel to the turn, this is a popular side handle for both latching and non-latching applications.

When combined with the CL100 Mortise Lock and euro profile cylinder it makes for a great looking security option.

Requires minimum door thickness of 1-1/2" (37mm).

Handles & locks for sliding doors

Dimensions

Flush Pulls

All CL100 Lock Cases come with the option of a built-in Flush Pull in either Stainless Steel or Brass.

This Flush Pull is designed for use on doors which slide completely inside a wall.

CL100 Flush Turn and Flush Pull on aluminum door leaf.

Key Locking

Key locking may be added to the CL100 Mortise Lock with the addition of a Euro Profile cylinder with American Schlage C Keyway, specified as either KA (Keyed Alike) or KD (Keyed to Differ).

Please note that this specification must be done at time of order.
